Awards & Honors

Dean's List

RIT (2013-Present)

Ibero-American League Scholarship

Ibero-American League (2013-Present)

Recent Projects

Trump Card

iOS App Development (December 2016)

Swift

Trump Card is an iOS game built using Swift 3. The game is a take on the 2016 presidential election where players take the role of then presidential candidate Donald Trump and answer questions with his actual answers to earn favorability with voters in order to win the election.

270

Hybrid App Development (May 2016)

AngularJS • Ionic Framework

270 is a hybrid app created using the Ionic Framework, Sass and Angular. The app also follows the MVC model. 270 is an U.S. historical and government trivia game where players choose a party and answer trivia to earn the 270 electoral votes needed to win the Presidency.
